## PROJECTS :

- **Frontend College Website**

Description: I have designed a modern and visually appealing front-end and college website that seamlessly integrates intuitive navigation, captivating visuals, and informative content to provide an engaging user experience for students, faculty, and visitors .

- **Chess Game**

Description: I have designed a project which creates a visually appealing representation of a chess game using HTML, CSS, and JavaScript. It generates an 8x8 grid with alternating white and black cells, mimicking a chessboard, and places standard chess pieces on their initial positions.

- **Python Jarvis**

Description: I have created a project called Jarvis which is a voice-activated virtual assistant using Python. It uses speech recognition and natural language processing to understand user commands, performing various tasks such as sending emails, fetching information, and managing reminders. With an intuitive interface and customizable features, Python Jarvis offers a seamless and efficient user experience.

## CERTIFICATIONS :

- Infosys Springboard (Python Programming)
- Infosys Springboard (Java Programming)

## PERSONAL DETAILS :
